It is prohibited to barge pots or tow boats for the purposes of hauling gear before, during, or after the fishery opening.

Each boat shall have 1 permit per boat and not fish more than 30 tagged or zip-tied pots. Zip ties may only be used for marking pots in this opener and only by tribes transitioning to use of a pot tagging system when tags are not available. All other tribes with a pot tagging system in place shall use the appropriate tags for this fishery.

All buoys must be marked with the vessel number of the boat fishing that gear.

All registered boats must set and pick their own registered gear.

The use of ground lines is not permitted during summer fishery.

All gear shall be removed from the water prior to the time of fishery closure, subject to two narrow exceptions. First, if gear cannot be lifted from the water prior to closure because of a mechanical failure, fishers must immediately notify Enforcement. Enforcement will document

any breakdown including any gear lifted from or remaining in the water. Another boat or Enforcement may lift the pots but the gear may not be redeployed. Second, if winds are above 20 knots and it would be unsafe to transport the pots, the gear can remain in the water in non-fishing condition until it is safe to transport.

Fishers shall not have crab on board a vessel while recovering pots after closure of the fishery.

It is unlawful to have on board a vessel, purchase or attempt to sell a female crab or male crab less than 6.25 inches measure across the back in front of the horns.

It is unlawful to have on board a vessel, purchase or attempt to sell soft crab.

There shall be no crab in transit to a buyer more than 4-hours after the close of a fishery.

Violation of in-common restrictions will subject to penalties in individual Tribal codes.

JUSTIFICATION: Pursuant to the 2022-23 Harvest Management Plans for Region 1 and harvestable surplus.
